

Is your company ready?

For regulatory reporting under REMIT?

Are you interested?

In a **free of charge** solution to help you to comply with Regulatory Transaction Reporting?

eRR

electronic Regulatory Reporting

The industry standard solution to cross-jurisdictional Regulatory Transaction Reporting

EFETnet's electronic Regulatory Reporting (eRR) is the response to a growing operational need to comply with regulatory reporting obligations by which EFET member companies are and will be bound.

The implementation of regulatory reporting requirements is having a significant impact on operational processes and systems in your company. EFETnet's eRR is your solution to efficient and effective regulatory reporting for your company as well as for the broader market place (e.g. brokers, exchanges, clearers).

EFETnet's eRR establishes Straight Through Processing for regulatory reporting, delivering reporting compliance for REMIT and EMIR. eRR operates through a single open industry standard interface providing connectivity to the different regulatory repositories.

eRR: effective, cost efficient and reliable

EFETnet's eRR offers the most cost efficient solution for existing and future regulatory reporting requirements.

eRR benefits:

- Single open industry data format and interface for all submissions
- Free of charge for users of EFETnet's eCM solution
- Extensive reconciliation of portfolios using eRR and third party data

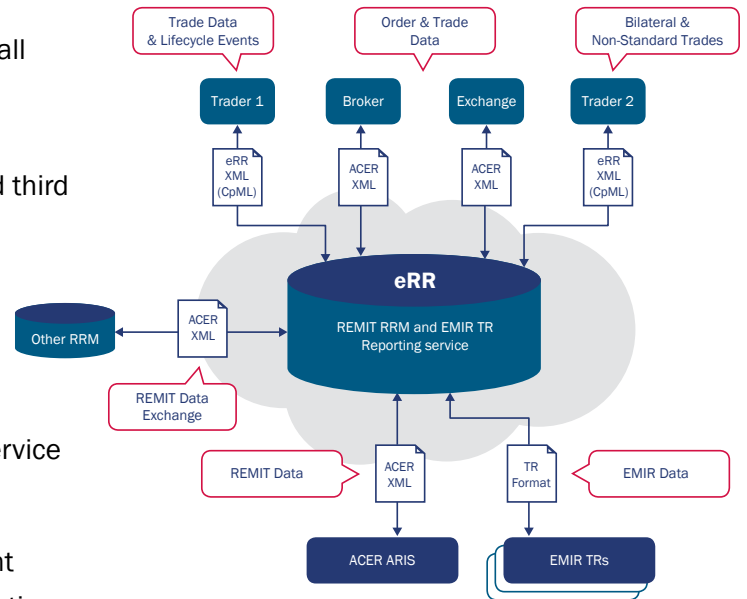

eRR benefits for:

Traders

- Automate the regulatory reporting process
- Address all regulatory reporting through a single service

Brokers, Exchanges and Clearers

- Facilitate regulatory reporting on behalf of the client
- Full support for OMP reporting - Orders and Transactions

Join more than 200 trading entities who have successfully reported over half a million trades under EMIR
